

To the Members of the California State Senate:

I am returning Senate Bill 1791 without my signature.

While I am supportive of transparent and accessible tax base information, this is already adequately provided by existing systems. If school districts need this information, they currently have the ability to compile it by working with local tax officials.

This bill would unnecessarily create new annual General Fund (Non-Proposition 98) cost pressures in the hundreds of thousands of dollars by having the State mandate these compilations.

Therefore, I am unable to support this bill.

Sincerely,

Arnold Schwarzenegger
